Interest in Learning English by Wikipedia Version

Analysis Report (June 28 - September 26, 2026)

Key Findings

Analysis Period: 90 days (June 28 - September 26, 2026)
Total Views Across All Versions: 104,636
Platforms Analyzed: Polish, Turkish, Spanish, Vietnamese, German Wikipedia

Pageview Statistics

Rank	Language	Views (90 days)	Market Share	Avg Daily
1	German	40,101	38.3%	441
2	Spanish	34,063	32.6%	374
3	Polish	14,646	14.0%	161
4	Turkish	8,773	8.4%	96
5	Vietnamese	7,053	6.7%	78

Key Insights

1. Market Concentration: German (38.3%) and Spanish (32.6%) together account for 70.9% of all views

2. Growth Trends: Polish (+4.0%), Turkish (+3.9%), and especially Vietnamese (+5.2%) show positive momentum, while German (-1.8%) and Spanish (-1.6%) show slight declines

3. Opportunity Markets: Growing interest in smaller markets (Polish, Vietnamese, Turkish) suggests these regions represent high-potential expansion opportunities

Recommendations for Next Research Phase

Priority 1 - Vietnamese Audience: Highest growth rate (+5.2%) indicates strong emerging demand. Target demographic appears to be young, digitally-native learners.

Priority 2 - Polish Audience: Combines significant absolute volume (14,646 views) with positive growth (+4.0%). Geographically closer to Eastern European markets including Ukraine.

Priority 3 - Turkish Audience: Smaller current base but consistent growth (+3.9%) and large population base (85+ million speakers) presents scaling potential.

Maintain - German & Spanish: Already dominant but showing saturation signals. Consider specialized segments (business English, technical terminology) rather than general audience expansion.
